

PTF European Collection

The PTF European Collection offers home-owners a vast range of stunning, contemporary engineered solid hardwoods to choose from in a range of extra wide boards and surfaces.

Beautiful natural timbers harvested from forests into progressive products such as Roman Oak capture a natural warmth that blends with modern interiors, and delivers new creative license to any designer.

This modern Engineered flooring reflects the hallmarks of timbers from century old craftsmen making bespoke flooring for some of Europe's oldest buildings and now delivered in a range of textured, matt or pre-finished surfaces and really delivers a premium flooring product.
