

PTF Leather Range

The PTF European Leather range sets new standards for flooring innovation and room design as the luxury feeling of Leather is transformed into a designer range of colours and textures.

Make a statement with the glamour of genuine Leather overlaid on a natural Cork base and evoke the senses as a feeling of warmth, comfort and quietness is carried through the home.

The luxury feel of Leather adds a new dimension to feature floors in hallways and entrances and warmth and texture adds sophistication to Lounges and theatre rooms. Why not even consider using Leather as a vertical feature statement on walls?

As this is an Engineered flooring product, it is easy and quick to install. This product uses 100% recycled Leather and renewable Cork.

Maintenance and floor-care is easy using our special Loba floor care.
